

CASTTV.COM FOR GOOGLE TV

Designed and developed a UI optimizing casttv.com for display on GoogleTVs (720p). Because this was done purely in styles (CSS), there was no significant rewrite of code required.

CASTTV iOS APP

The CastTV app was designed to make it simple to search for specific shows and return clear results displaying exactly which app or site has an iOS playable version available.

Submitted and approved to the App Store but withdrawn voluntarily (CastTV acquired by TMS)
